The Alberta Pacific Grain Company Ltd.

COMMENCING business in the North-West Territories in 1901—four years prior to the formation of the Province of Alberta—The Alberta Pacific Grain Company, and predecessor Companies, carries in its records a long line of service to the farmers of Alberta.

ALBERTA Grain Company, Limited, under the able management of John I. McFarland, commenced business in 1901. Total production of wheat in Western Canada in that year had reached less than 65,000,000 bushels. Under Mr. McFarland's policy of fair dealing with all farmers, the growth of his Company kept pace with increasing wheat production in the West. In 1912 Alberta Pacific Grain Company, Limited, was brought into being under guidance of Mr. McFarland, and consisted of an amalgamation of Alberta Grain Company and Alberta Pacific Elevator Company, Limited.

THE "A.P." organization continued to grow. Its elevators followed the railway construction crews into the newly cultivated areas of Alberta and extended its operations into Saskatchewan and Manitoba.

WITH the completion of the building of the Panama Canal the "A.P." became a pioneer in the movement of grain to import markets through the Western route. Terminal elevators, having a capacity of 5,250,000 bushels have been acquired by the Company at the Port of Vancouver.

THE "A.P." system has passed through the financial stress of 1907-08; the war and its aftermath; boom periods and the business upheaval of the past three years—a period of years, many of which have been obscure and filled with business uncertainties. In all its three decades of dealings with thousands of farmers and the handling of hundreds of millions of bushels of grain, the Company has never failed in an obligation to any client. Among its customers today are pioneers of Alberta who drew the first bushel of grain they produced in the Province to an "A.P." elevator.

FAIR-DEALING with its customers, coupled with competent office and field staffs; efficient physical grain handling equipment and desire and ability to return to the grower the most that can be obtained for his grain, has brought the "A.P." system from its humble beginning in 1901 to its present position in the grain trade of Canada.

THE policies of the "A.P." today are and will continue to be, those of the founder of the "A.P." system.

J. H. Murray
GENERAL MANAGER

Golf Gossip.

One of the most successful tournaments yet held was staged over the local golf course on Wednesday afternoon.

38 members took part in some of the closest games of the season and low scores were the order of the day. The heat certainly affected the players the right way.

The lunch served by the ladies in the garden provided the main attraction. Thanks, ladies! The gentlemen salute you!

The result of the President v. Vice President match was a close one. The President lost by 3 matches but beat out the Vice by 38 strokes.

Dr. Oatway certainly provided the upset of the day, when he came in with scores of 37 and 31.

Bill Comisarow was another dark horse. Playing away below his handicap he shot a 35 and 37. Good work, Bill!

Miss Lucy Enders gracefully accepted the cup won by her in the last competition. Hope she can retain it in the next.

Nearly all the members appeared anxious to enter another tournament for prizes which will be held shortly. Entrance fee 25c. Members who wish to enter are requested to give in their names to the Secretary, so that the draws may be arranged immediately.

Schools Opening.

Stony Plain Public and High schools re-open today Thurs. Sept. 1st, with one change in the staff from last session, Miss Miller having resigned. The staff now consists of the Misses Everson, McDonald, Wood, Collicutt and Mr. D E Meyer.

It is expected the attendance in the High school will reach a record mark this session. While the sessions open Sept. 1st this year, last year's custom will be followed in keeping open Monday, the 5th and the following days.

The classes at the Saint Matthew schools resumed on Monday last, Aug. 29th, with Mr. Walter Rosnau in charge at No. 1 school, and Mr. Ph Enders as teacher at No. 2 school, the one located in Stony town.

The New Cockshut Agent

Mr. Lorenz Zilliox is now the local agent for Cockshut implements, satisfactory arrangements to this end having been made with the executor of the estate of John Henry Enders, the former agent; and the Cockshut Co.

Mr. Zilliox now has a stock on hand of the implements of this well known company, and has also the parts for same; and is prepared to fill orders for either the implements or parts at shortest notice. Mr. Zilliox has still a few bundles of binder twine left, at his warehouse, as he has been acting as agent for the Stony Plain Constituency Co-op. for this commodity.

The Holding Of Conferences

The holding of conferences has become such a common practice since the close of the Great War, and considering the magnitude of world problems still calling for solution, so little has apparently been accomplished, that many people are inclined to question the utility of such gatherings and to be critical of the comparatively heavy expense which they entail. Within recent months, for example, there has been the international conference on disarmament held at Geneva, the Lausanne conference on war debts and reparations, the Imperial Economic Conference at Ottawa on preferential trade within the British Empire, and very shortly a world economic conference is to assemble at London, England. Are they worth while, and have they really accomplished anything, people are asking.

There are, of course, certain types of people who belittle all attempts to remedy evils and achieve reforms by way of negotiation and compromise. They predict failure for each conference in advance of its meeting, perhaps, in many cases, the wish being rather to the prediction, because they hold to the view that the existing financial and economic system of the world cannot be remedied but must be torn up root and branch, completely destroyed, and replaced by an entirely different system founded on new principles. Others, less radical, have seemingly lost confidence in the ability or willingness of the nations to abandon their extremely selfish nationalistic policies and programmes and work together for the common good of all.

While progress has been slow, and many of these conferences disappointing, in the tangible results accomplished, it would be a great mistake to regard them as failures. For example, while the world still has a long way to travel along the road of international peace, it is travelling in that direction, as we never the real advance in the limitation in the number, size, and power of naval craft to be maintained by the leading maritime nations. Disarmament can only be brought about by a restoration of confidence and trust among peoples; it is a matter of education and each conference held is a mighty factor in enlightening people's mind and stirring their consciences. Each such conference helps each nation to more fully understand and appreciate the viewpoint of other nations. And this is an essential first step to definite action.

Complete failure was predicted in advance for the Lausanne conference on war debts and reparations. Of course it did not achieve everything that was hoped of it. No conference ever does, probably never will. But the Lausanne conference did, as is now almost universally admitted, accomplish a great deal and take a long step forward towards the goal of a reasonable settlement of this most vexing problem, which has been an outstanding obstacle to the world's restoration to financial and economic health.

Failure was likewise predicted for the Imperial Economic Conference at Ottawa. Whatever its accomplishments, and these will not be fully known until the details of the agreements signed are laid before the respective parliaments of the Empire, the conference did not end in failure. It failed of course to reach all the decisions that many people desired, and, on the other hand, it failed in the eyes of others because it reached decisions to do things not acceptable to them. Where so many conflicting interests had to be reconciled, and, failing complete agreement, compromises reached, it follows that what is regarded as failure by one interest or group is acclaimed as success by the opposing group, and vice versa. Success or failure are, therefore, comparative terms. The main thing is that each component part of the Empire now understands the position, problems and economic difficulties of all other parts as never before, and each has displayed a willingness to go as far as possible in solving those problems and overcoming those difficulties. That is all gain, and full of promise for the future. The conference really sounds the death-knell of extremist trade restriction policies and unlocks the door of freer and wider Empire trade. This must inevitably lead to freer and wider world trade.

Finally, those who are critical and skeptical of the value of these conferences will do well to remember that in olden days nations did not trouble very much to confer about their difficulties and strive to find a way out compatible with the dignity and interests of all; rather they were glad to find even the smallest excuse to wage war on each other. The world is turning away from that barbarism, and conferences are the medium, slow and tedious perhaps, but in the final result more beneficial and lasting, replacing war. True, international conferences cost money, fairly large sums sometimes, but a mere bagatelle to the tremendous cost of war.

A Costly Lawsuit

Customer Of Paris Underground Railway Way Had No Case

A lawsuit which lasted six years has just been concluded in Paris. The amount at issue was five centimes. Apparently, after a book of tickets for the Metro, the Paris underground railway, had been bought, fares were raised, and a supplementary charge of five centimes was demanded when one of the tickets was presented. The result was that this action was brought against the Metro. It has failed, after the plaintiff has spent sufficient in costs to have taken him round the world.

Windmills In England

Artist Discovers More Than Ten in The Netherlands

Windmill laurels are usually given to Holland, but facts are not in accord with popular belief. An artist of Gainsborough, in Lincolnshire, England, K. S. Wood, has discovered that England has over two thousand windmills and that there are only 1,700 in the Netherlands. Mr. Wood is now busy painting them before they disappear. He has done 200, and while he has been at work more than one hundred mills have been pulled down. Lincolnshire leads with one hundred and seventy windmills.

Troubled With Her Children Having Summer Complaint

Mrs. L. E. Montgomery, Ave. E. South, Saskatoon, Sask., writes:—"I am the mother of two children and have a great deal of trouble with them having summer complaint, in fact, several times every Summer they were subject to attacks."

"I have found Dr. Fowler's Extract of Wild Strawberry to be the most effective remedy and keep it always handy and give it immediately on the first sign of any bowel complaint."

"Thanks to Dr. Fowler's I no longer dread the Summer months."

More Divorces In West

Increase Is Shown In The Four Western Provinces

Divorce is decreasing in Quebec, Ontario, Nova Scotia, Prince Edward Island and the Yukon, but in New Brunswick, Manitoba, Saskatchewan, Alberta, British Columbia, and the North West Territories it is increasing according to figures taken at the census by the Dominion Bureau of Statistics. There are in all Canada 7,441 divorced persons as compared with 7,401 ten years before. They numbered 4,400 in 1912, and only 661 in 1901.

The striking feature of the divorce situation in Canada is that in the old provinces with an older Canadian population, and with a more homogeneous and with more of its population province-born, divorce has decreased. But in the newer provinces where there has been a larger percentage of incoming population divorce has increased. The most notable example of this is British Columbia where the proportion of those born outside that province is the greatest in Canada, the greatest increase in divorce has taken place.

The increase in British Columbia is 622 in a decade, or from 1,030 to 1,652. That increase is greater than the total increase in Canada which was only 40. Alberta coming second in the category of non-province-born, increased 312, or from 102 to 1,014. Manitoba, which has a greater urban population than Saskatchewan increased from 506 to 605, Saskatchewan from 670 to 687.

The increases in the four western provinces was 1,178, while the decreases in the eastern provinces amounting to 1,138. Some of the difference, of course, would be due to difference in divorce legislation.

Daring Flight Proposed

Piccard Plans To Make Balloon Ascent Over Hudson Bay Next Summer

Prof. Auguste Piccard, the only man who has looked twice upon the world from 10 miles above it, plans to ascend to the stratosphere again next summer from the northwest shore of Canada's Hudson Bay.

In some ways it would be a more difficult flight than the first two, for the winds blow across northern Canada might drop a balloon in wastes as dreary and inaccessible as anywhere on earth.

Nevertheless, as soon as the Belgian scientist has finished calculating results recorded by the instruments he will begin preparations for the third expedition.

"We will take off from the northwest shore of Hudson Bay, as close to the north pole as we can get," he said, recently. "Our purpose will be to complete the study of cosmic rays at a point where the lines of magnetic force penetrate the stratosphere. We know how the rays act under these conditions we will have the answer to many scientific problems."

The professor said that he had risen nearly 55,000 feet, a point at which the temperature inside the gondola of the balloon was five degrees below zero fahrenheit, and outside 47 degrees below.

Persian Balm promotes daintiness, charm and beauty. Magical in its effect on the skin. There is nothing like it for creating and preserving a lovely complexion. Cooling, carefree, it soothes the skin, and is caused by weather conditions. Delicately fragrant, it enhances the most finished appearance. Makes the skin cool-leaf in texture. Truly a poetical toilet requisite for every discerning woman.

Luxurious Car For Boy

Built To Order For Young Son Of Indian Prince

What is described as the most luxurious car ever built to order for a boy has been completed in England for the eleven-year-old son of an Indian prince, the Maharajah of Jodhpur. Beneath the hood is a four-cylinder motor that will drive the car 74 miles on a gallon of gas. The miniature seats, as well as the steering wheel and controls, are boy-size. In all respects save one the car might typify the fondest day dream of an average boy. The Maharajah has ordered special gears installed that will limit the driver's speed to 15 miles an hour.

An Oasis Of Beauty

New Park In The Cypress Hills Of Saskatchewan

The motroad on the south road out of Maple Creek, Saskatchewan, eleven miles to the newly created Cypress Hills Provincial Park, an area of eighteen square miles of pine covered hills that lies twenty miles south of the town. Here have been established by the government a forest reserve and game sanctuary. The streams are clear and cool, well suited to the rainbow and Loch Leven trout fry placed in them some years ago. As a result of the wars between the Crees, Assiniboines and Blackfeet, this area became a "No Man's Land," was little hunted and became a haven for wild life, and to this day it has been a favoured spot. The traveller is hardly aware of approaching the park, until suddenly topping the crest of hills there breaks into a beautiful scene of forest and stream. It is truly an oasis of beauty, located in the Cypress range of broken hills, scarred with deep ravines, fantastic crags and rounded elevations.

Dams placed in Belanger and Lone Pine creeks, tributaries of the Fringean River, which flows itself across the Montana border, have created two charming lakes, 4,000 feet above sea level, known as Loch Lomond and Loch Leven, having a water area of approximately 200 acres. In addition to rustic bridges that furnish the woodland paths in the new park, there will be found accommodation for the vacationist that includes splendid camp sites, a sixteen room sleeping building, and a nearby kitchen house.

Perils Of Motor Fatigue

Great Risk Of Accidents When Driver Is Drowsy

Regulations now demand that drivers of motor trucks shall remain on duty for only a certain period of time, so that there may be less risk of them falling asleep at the wheel and bringing injury to themselves or others on the road. This is a sensible provision, the full force of which is revealed in the number of highway accidents directly traceable to fatigue on the part of drivers, and if it were possible for operators of private motor vehicles voluntarily to adopt the same rules, there is no doubt whatever that there would be a marked lessening in the number of traffic accidents. Safe operation of motor vehicles necessitates unceasing vigilance on the part of driver. It cannot be carried out without great risk, especially on much-travelled roads, if the driver even nods at the wheel. And if he is so overcome with fatigue that he falls asleep, the consequences may be (and very often are) most disastrous.

The Proven Asthma Remedy. Since asthma excited there has been no lack of much heralded remedies, but they have all proved to be failures and worthless. The ever-growing reputation of Dr. J. D. Kellogg's Asthma Remedy has given a place to this field of medicine which no other can approach. It has never been pushed by sensational methods, but has simply gone on effecting relief and making new converts.

Two Exceptions

An Irish magistrate, one of the old school, was summing up a case in a Dublin court. The plaintiff was a handsome woman, and her good-looking daughter was one of the witnesses.

"Gentlemen of the jury," said his honor, "everything in the case seems plain—except, of course, Mrs. O'Toole and her charming daughter."

Nearly all children are subject to worms, and many are born with them. Spare them suffering by using Mother Graves' Worm Exterminator, an excellent remedy.

Sure To Be Clean

An English actor appearing at a seaside resort for a week, had some difficulty in securing accommodation. In the end he was forced to consider very grubby digs.

Being a fastidious fellow he said to the landlady, "Are the sheets on my bed clean?"

"Lor' bless you, yes, sir," replied the woman. "The last gentleman as 'ad 'em, took 'is 'swim reg'lr every Friday."

Twelve thousand performers took part in a cotton pageant held recently at Manchester, England.

WOMAN LOSES 28 lbs.

Trips Upstairs Like a 2-Year-Old

A woman writes:—"Three months ago, after much argument, I was persuaded against my will to try Kruschen Salts to reduce my weight, which was 222 lbs. I had tried other young, but all to no avail. After three weeks of Kruschen I had lost 5 lbs. 4 oz., and I felt five years younger. I really must say I feel a different woman. My age is 37 years. I have now lost 28 lbs. to date, and while before, to go upstairs was a great effort, now, as my husband says, I trip up like a two-year-old."—(Mrs.) S. G. R.

Kruschen Salts keep the system free from encumbering waste matter. Unless this wastage is regularly expelled it will give rise to rheumatic and other body poisons. And Nature is liable to take the defensive measure of storing the waste matter in the form of fatty tissue. Unlike most salts, Kruschen is not merely a laxative. It is a combination of six salts which have a tonic influence upon every organ, gland, nerve and fibre of your body.

Reward Wheat

Is Finding Favor In A Number Of Saskatchewan Areas

Reward wheat is finding favor in an increasing number of Saskatchewan districts according to Prof. J. B. Hargrave, president of the University at Saskatoon. Several farmers on the heavy soil north of Moose Jaw report better yields from Reward than Marquis.

At Krydor, R. Ramsay, extension worker of the University of Saskatchewan, found that Reward wheat was replacing Garnet in favor. The Garnet wheat had lodged badly and shows considerably rust this year, particularly in the lodged spots. The Krydor district had a heavy crop and cutting was well advanced.

Dr. Hargrave has returned from a trip of 1,800 miles in the province chiefly undertaken to compare tests made of Reliance wheat and Marquis wheat grown side by side at a number of points in the province.

It Has Many Qualities.—The man who possesses a bottle of Dr. Thomas' Electric Oil is armed against many ills. It will relieve a cough, break a cold, prevent the throat, it will reduce the swelling from a sprain, relieve the most persistent sore and will speedily heal cuts and contusions. It is a medicine chest in itself.

A Colony Of Dwarfs

Everything Built On Small Scale In Suburb Of Berlin

In a southeastern suburb of Berlin a colony of some fifty dwarfs has established a miniature town. Everything for the little people is on a small scale, "small houses with small rooms filled with small furniture. The inhabitants are mostly stage folk. They have recently received official recognition of their village by the postmaster-general. He has given authority for the building of a small post office to be called Zwergerstadt, or Dwarf City. The midday citizens have planned their tiny houses not only for their own comfort, but to exclude persons of normal height.

Distemper responds quickly to Douglas' Egyptian Liniment. Keep a bottle handy in the stable.

Ahead Of Dominions

It may amaze some people to learn that the value of the output sold of the farms of the United Kingdom exceeds that of agricultural production in either Canada or Australia. For the average pre-depression year, it is estimated by a writer in the London Times at \$300,000,000 as against \$275,000,000 in the Dominions mentioned.

The nest of an American eagle weighs from 10 to 12 pounds.

Great Bear Lake Mineral Field Destined to Place Canada in Front As Largest Radium Producer

"Almost too good to be true," is the way J. C. McNabb, engineer of construction Canadian Pacific Railways, describes prospects in the Great Bear Lake mineral fields, following an inspection tour.

Mr. McNabb firmly believes in the enormous potential wealth of the district, he declared, and it will some day place Canada in the forefront of the world as a radium producer. Silver, copper and other valuable minerals abound there.

The new reducing plant, established by the Dominion Department of Mines in Ottawa, has completed several extractions of radium from the Great Bear pitchblende with "almost fantastic results," he continued. From 97 to 98 per cent. of the radium has been extracted from the ore in each test.

"The plant was placed in Ottawa rather than at Great Bear Lake because three tons of acid to one ton of ore are used in the reduction process," he said. "Thus it is cheaper to ship out ore than to ship the acid to Great Bear owing to prevailing transportation difficulties and high freight rates inevitable when supplies must be carried by airplane or portage for many miles overland."

"I believe the Ottawa plant will become one of the leading units of its kind in the world. It is the only one of its kind in the British Empire at present and obviates the necessity of shipping the ore to Belgium or Czechoslovakia for reduction."

Mr. McNabb pointed out that the life of the radium salts secured from the Great Bear Lake pitchblende was estimated at 250 years while the Belgian product was effective for only 20 years. It was to be hoped, he concluded, that in the near future Canada would be able to break away from the Belgium combine with beneficial results for all mankind.

Century Of the Lawnmower

Machine First Used For Trimming
Nap Off Cloth

It is just a hundred years since the lawnmower was invented. It was not invented in the first instance for shaving lawns. The first machine of the kind was produced by Edwin Budding, a textile engineer, to trim off the nap from newly woven cloth, a task formerly done by hand with the aid of shears. This machine was responsible for an outbreak of riots in cloth-weaving districts. Budding saw that the cloth mowers of his time might well be applied to lawns, and he produced an extraordinary contraption about as big as a modern motor-car which did the job fairly well. His later machines were smaller.

B.C. Gold

Gold production in British Columbia increased by 25 per cent. in the first half of this year. Placer mining is active with 5,000 men in search of gold. Production of all minerals in British Columbia in the first six months of 1932 was valued at \$14,839,000.

Blagray, a farm house 300 years old, in Glasgow, Scotland, is to be torn down to make room for modern buildings.

Indians often made pets of beaver.

"Darling, do you think your mother will accept me as a son-in-law?"
"I am sure she will. We always disagree about everything."—En Rolig Tatt Timma, Gothenburg.

W. N. U. 1937

Fewer Giants and Dwarfs

Advance Of Medical Science Said To
Be Reason

The death of Vlado Velokovitch, the world's smallest man, at Ljubljana, near Belgrade, brings to light the fact that both giants and dwarfs are becoming scarce. The advance of medical science is responsible for this change, and although the average general height has decreased slightly there are fewer extremes at either end of the scale. Vlado earned his title with a mere 23 inches, but his widow is only four inches taller. While dwarfs are comparatively rare, there is much more competition for aspiring giants.

While doctors can offer no explanation for dwarfs, giants do not often exceed seven feet. A surprising number have surpassed this imposing height, though, the most notable giant of recent years being Machnow, a Russian manmoot man. Machnow attained the enormous stature of nine feet eight inches, or over five times that of Vlado. Machnow's appetite was in proportion to his bulk, for he required two quarts of milk, a dozen eggs and a couple of loaves of bread for breakfast. His dinner consisted of a mere three pounds of meat, five pounds of potatoes and half a gallon of beer, while at nine o'clock he fortified himself with a light supper of 19 eggs, three pounds of bread and butter and a quart of tea. For his evening smoke he could then stroll out and light his cigarette at a gaslamp.

John Middleton, a Lancashire giant of the seventeenth century, is reputed to have attained nine feet eight inches also.—The World-Wide News Service.

Canadian Troops Made Good Trade Emissaries

French People Acquired Taste For
Their Cheese and Jam

Canadian soldiers who served in France acted as trade emissaries for Canadian products, according to Col. H. Barra, Dominion Trade Commissioner in France.

During the Great War, he said, in a recent interview, Canadian troops shared their cheese and jam rations with French people and the latter developed a liking for these foods. As a result there is a demand for Canadian cheese and jam in France, particularly in the northern part.

Lodger: "Bring some soup, please."
Landlady: "What kind, sir? Wind-mill soup?"

Lodger: "Windmill soup?"
Landlady: "Yes. If it goes round, you get some."

"Their engagement is still a secret."
"So everybody is saying."

838
LOADS OF SMARTNESS HAS THIS
SNAPPY BLOUSE, WITH SLIM-
MING DIAGONAL CLOSING

And it's a model that can be carried out in a great many different materials.

For instance, here it is in a crepe silk print.

Then again, you may want something a bit more dressy as crepe satin in pastel shades or in white.

The rough crepe silks are sportive and well liked.

And it's the easiest thing in the world to fashion.

And as for the saving in cost—the medium size takes but 2 1/2 yards of 36-inch material.

Style No. 838 is designed for sizes 16, 18, 20 years, 38, 39, 40 and 42 inches bust.

Price of pattern 25 cents in stamps or coin (coin is preferred). Wrap coin carefully.

Airplane Delivers Paper

Lonely Fire Lookout In California

Receives Two Daily

Miles away from railroad or main highway the fire lookout at Fraser Peak, California, receives his daily paper by airplane.

A small group gathers twice a day to gaze at a speeding airplane as it drops a San Francisco newspaper on the way to Los Angeles and a Los Angeles newspaper on its way north again later in the day.

Jess Hart, the engineer on the flying craft, has received a letter from A. L. Ellis, lookout at the lonely station in the Tehachapi range, thanking him for the service.

Interesting Research Work Planned For Investigations In Regard To Durum Wheat

Think These Over

Difficult Questions Given Freshmen
At End Of First Year

Huge are some of the questions University of Chicago freshmen had to answer at the close of their first year of study under the direction of Robert Maynard Hutchins, the youngest university president in the country.

Do woodpeckers have sharp bills adapted for pecking wood?
Do moths collect about a light at night only because of the presence of other moths?

Do potatoes stored in the dark lose weight faster after sprouts have grown out than before?

Has the tapeworm a specialized alimentary tract?

Does the sheep weave its web to imitate its elders, or because of trial and error learning, instruction or instinct?

Is it true that polar bears are not found in the Antarctic because the environment is not suitable for their existence?

One of the most interesting questions asked the students to trace a "critical episode" in the life of a red blood cell that went adventuring with one of its fellows in a human body.

Brief Cognomens

World's Shortest Place Name Is In Sweden

The French claim the distinction of having the shortest surname in the world, writes a correspondent. That is "O," and it is fairly common in Paris. A good second is the Irish "Ek," which, curiously enough, is also found in Sweden.

Coming to the world's shortest place names, "A" in Sweden leads the way. Then "Om" turns up once more as the name of a town in the Chinese province of Honan. But Holland has the last word (or letter) with "Y," which is the name of a bay in the Zuyder Zee.

It is not necessary to go abroad for examples of short names, writes another correspondent.

In Inverness-shire there is the River E, rising in the Mousathill Mountains and forming a tributary of the River Gairn, itself a tributary of the River Foyers which flows into Loch Ness.

Britain's Largest Station

In Great Britain the largest railway station is Waterloo, where, in twenty-four hours, 1,400 trains are dealt with at twenty-three platforms. The busiest junction is Clapham Junction, through which upwards of 2,000 trains pass every twenty-four hours.

Pelicans have no song and the adults no call notes.

The Associate Committee on Grain Research, since its organization in 1927, has carried out an extensive programme of investigation of various factors affecting the quality of Western Canadian Hard Red Spring Wheat. Since quality is a purely relative term denoting the suitability of a given material for the particular purpose which it is intended to serve, such studies on the common or bread wheats involve a determination of their flour yielding capacity and their suitability for making yeast leavened bread possessing certain desired characteristics. For this reason the cereal research laboratories collaborating in the work of the Associate Committee on Grain Research are equipped with experimental flour mills and test baking equipment.

Durum wheat, however, is valued largely because of certain specific characteristics which make it particularly suitable for the manufacture of alimentary pastes such as macaroni, spaghetti and vermicelli. In the manufacture of these products, semolina, a refined granular product of the wheat is chiefly used, requiring special rolls which shear the wheat rather than crush it into flour. In order to remove bran and germ particles, a current of air is drawn through the material in a special apparatus known as a purifier. The experimental milling equipment for durum testing is constructed along similar lines to the large scale commercial machinery. An experimental mill and small purifier, specially designed for durum work is now being purchased as part of the equipment comprising a complete durum testing laboratory being installed in the Department of Agricultural Chemistry, University of Manitoba. This phase of the Committee's activities will be under the direction of Dr. W. F. Geddes. To determine the quality of semolina a experimental macaroni unit comprising a mixer, kneader, macaroni press and dryer is an essential part of the equipment and is being built by a prominent manufacturer of large scale macaroni machinery to rigid specifications.

In contrast to the flour milled from bread wheats, an intense yellow pigmentation is desired in semolina. This coloration is due to the pigment carotin and for its accurate determination a spectrophotometer is essential. The addition of this apparatus to the laboratory equipment of the Committee will not only enable accurate quality studies on durum wheat to be carried out, but will be of inestimable value in determining the carotin content of flours milled from different varieties of bread wheats. It will also be useful in a study of the relative ease of removal of the yellow colour from the different flours by means of bleaching agents.

The laboratory about to be installed will be the only one in Canada and will permit the Committee to carry out projects on durum wheat, such as have already been completed on the common wheats. The durum projects will include studies of varieties and the influence of environment on macaroni making quality.

A physicist finds that a room full of men can hear a speaker better than the same room full of women, because heavy clothing that men wear absorbs sound waves.

Among our special ambitions is to be the weak link in a chain letter.

"Walter, throw that drunken man out."

"He has already gone, sir."

"Bring him in again, and throw him out."—Vart Hen, Stockholm.

SCOTLAND TO HONOR GREAT NOVELISTS MEMORY

Preparations are now well advanced for the celebration of the death of Sir Walter Scott (September 21, 1832). All during September two rooms in the National Gallery at Edinburgh will house a collection of Scott portraits and manuscripts, and on September 21 a commemorative service will be held in St. Giles' Cathedral (at right of picture), with a view of Princes Street, Edinburgh, with the Scott Memorial in the foreground, and in the background a portrait of the creator of Waverley Novels.

WORLD HAPPENINGS BRIEFLY TOLD

Peter Veregin has resigned as president of the Christian Community of Universal Brotherhood.

Wilton Lackaye, 69, for almost 40 years one of the best-known actors on the United Stage, died at his home in New York, of a heart ailment.

Recommendation has been made that Admiral Sir David Murray Anderson, C.B.E., enquire to His Majesty, be appointed Governor-General of Newfoundland.

The Soviet secret police and local authorities in a decree issued by the government were ordered to adopt energetic measures to stamp out private speculation in foodstuffs.

Word has been received of the death, in Karizawa, Japan, on August 19, of Dr. John G. Dunlop, noted Canadian missionary, who for the past 15 years has been in Japan.

Royal cattle have been sold to Communist Russia, it is understood. Two shorthorn bulls, exhibited by King George at the recent Royal Agricultural show, were purchased by the Soviet.

Madeline Slade, follower of Mahatma Gandhi, the Indian Nationalist and civic disobedience leader, has been sentenced to one year's imprisonment for defying government ban against her appearance in Bombay.

London jewelers now use smoke screens to save their diamonds from window-smashing thieves. "Smash-and-Grab" raids have grown so alarmingly that insurance companies have raised their burglary rates.

Members of the Irish Republican army have warned managers of Dublin moving picture theatres not to exhibit films showing members of the royal family, or any films which they regard as containing "British propaganda."

For Unemployed Families

Seven Provinces Have Signed Agreement Under Settlement Plan

Seven Canadian provinces have signed agreements under a relief settlement plan by which the Dominion, Province, and municipality concerned each contribute one-third of a sum not exceeding \$600 per family to cover the cost of modest establishment on the land and substitute themselves the land and subsistence for the first two years. The relief settlement plan is for unemployed families resident in the provinces, who are in receipt of direct relief, and are qualified and physically fit to undertake life on the farm.

This relief settlement plan is primarily an unemployment measure—not a colonization scheme. The underlying principle of the plan is to help people to help themselves by enabling families to contribute to their own maintenance and eventually become self-supporting. Public moneys that would otherwise be spent in the form of direct relief to maintain families in comparative idleness will be expended toward assisting qualified families to get a modest start on the land.

Recognition Deserved

A "Long Service" prize was presented to an old woman of Bologna, Italy, named Francesca Felicetti, for having been employed by one family for seventy-seven years. She had entered their service at the age of twelve. Twenty-nine other servants have also been presented with prizes for over forty years' service with one family.

Seven-tenths of the railway mileage in the Netherlands East Indies is in Java.

Heir: "Is there no hope, doctor?"
"Well, sir, it depends on which way you look at hope."—Allitt for Alls, Stockholm.

W. N. U. 1937

New Equipment For Houses

Air-Cooling System Will Be Part Of Modern Necessities

The day is coming when "a modern house" will mean not only one equipped with a bathroom and a furnace, but with an air-cooling system. The device is still too high priced, and more or less in the experimental stage; but it will become perfected and less expensive in a few years, and we shall then be able to live and sleep in quiet, air-cooled and air-washed rooms, with the house windows and doors shut to keep out the hot air, and incidentally, the disturbing noises of the streets.

Helped To Make History

Man Who Surrendered Jerusalem To British Died Recently

The man who surrendered Jerusalem to the British recently died in the Government hospital at Hebron at the age of 65. He was Ahmed Sharrad, and was an Inspector in the Turkish gendarmarie in Jerusalem when it was captured by the British in 1917. In company with the late Mayor of Jerusalem, the Inspector walked to the outskirts of the city carrying a white flag on a long bamboo pole and delivered it to the British vanguard.

GUIMPE IDEAS REFLECT YOUTHFUL TREND IN CREPE SILKS AND COTTONS

For this model which is adorable a navy blue crepe silk with the guimpe of vivid red silk spotted in blue, there are numerous possibilities.

It can be fashioned from lace cottons of the soft woolly type, cotton or silk pique, a sports linen in combination with handkerchief linen. This woolens and many rayon novelties.

It will take the very minimum of making. The two-piece skirt is finely tacked at the top and joined to the two-piece waist. You'll find the separate blouse very easily put together. It can have short sleeves, if you prefer them.

Style No. 424 is designed for sizes 14, 16, 18, 20 years, 36 and 38 inches bust. Size 18 requires 2½ yards of 39-inch material for dress with 1½ yards of 39-inch material for blouse. Price of pattern 25 cents in stamps or coin (coin is preferred). Wrap cloth carefully.

RIVERBEND SCHOOL FOR GIRLS

Manitoba Institution Devoted To The Educational And Aesthetic Development Of Young Canadian Womanhood

Prepared to provide instruction from Grades 1 to 12, Riverbend School for Girls, Winnipeg, will reopen for the autumn term on September 13th, according to an announcement made by the Principal, Miss Joan Foster, M.A.

Since 1929, when Riverbend, the former home of the late Sir James Aikins, became, through his bequest, under the aegis of the United Church of Canada, a boarding and day school for girls, it has reached an academic standard approved by the Department of Education, by which it is regularly inspected. Eight acres of beautifully treed property skirting the Assiniboine River have proven an ideal location for an institution devoted to the educational and aesthetic development of young Canadian womanhood.

Two years ago, the original buildings were augmented by a new modern structure of cut stone and brick, containing assembly hall, dining-room, class-rooms and gymnasium, with ample accommodation for 190 pupils. University matriculation is an objective, but to meet the needs of those who wish to devote themselves more particularly to the study of literature, history, music and art, a course is offered leading to the Riverbend Diploma, given upon completion of Grade III.

Miss Foster, who is a graduate of McGill and Oxford, is assisted by Miss Laura Cull, as head of the junior school, and the more recent acquisitions to the teaching staff include Miss Marian Macdougall, science; Miss Mary Chestnut, classics; Miss Beatrice Wilson, director of religious education; Miss Barbara May Erith, English; and Miss Helen M. Bowman, physical education.

Miss Macdougall, a graduate of Dalhousie University, comes to the Riverbend school as a qualified teacher of the science required for senior high school work, specializing in University and the Ontario College of chemistry. Miss Chestnut, Manitoba

Demand For Flaxseed

The Canadian Department of Agriculture reports a good demand in Ireland for Canadian pedigreed flaxseed for sowing purposes. The demand of the Irish linen industry for Canadian fibre flaxseed is attributed to the quality, germination and purity of the seed assured by the system of government inspection which is in effect.

Bulgaria plans to spend \$9,250,000 on its state railways.

Education, has taught successfully in Manitoba high schools, Miss Wilson, in addition to her course at University College, Toronto, has studied at Emmanuel College and the United Church Training School, and has taken on the regular normal school training course with subsequent success as a teacher. Miss Erith comes from London University with honors in English. She holds a London teacher's diploma and has had experience in English and American girls' schools.

Thoroughly qualified to teach corrective gymnastic, dancing and swimming, as well as apparatus work, Miss Bowman is a graduate of the Margaret Eaton School of Physical Education, Toronto, and has had previous experience in a girls' school. Due to the fact that the Winnipeg city schools are this year discontinuing the teaching of Grade XII, increased emphasis has been placed upon this grade at Riverbend. The members of the teaching staff are all fully qualified, and are specialists in the subjects taught.

On its Advisory Council are many names familiar in the church and cultural life of Winnipeg, and the following from other points in western Canada, from which many of its pupils are drawn: Mrs. C. E. Armstrong, Moose Jaw; Mrs. Robert Forks, Pipestone; Mrs. C. F. Adams, Calgary; Mrs. A. F. Laird, Yorkton; Mrs. E. C. Wallace, Edmonton; Mrs. J. E. Brownlee, Edmonton; Mrs. W. C. Murray, Saskatoon; Mrs. T. A. Neelin, Brandon; Miss Alice Fife, Kenora; Mrs. Douglas J. Thom, Regina; Mrs. A. W. Scott, Calgary.

Times Have Changed

An old farmer after paying his bill for a new reaper and binder was asked by the cashier how it went.

"Well, ye see, this time last year I sat on the fence with a cigar in my mouth and watched thirty men reaping my field. This year I reaped it myself, and thirty men sat on the fence and watched me."

Comb was an old British corn measure, containing four bushels.

SUNDAY SCHOOL LESSON

SEPTEMBER 4

EVILS OF INTEMPERANCE

Golden Text: "Drink no wine nor strong drink."—Leviticus 10:9
Lesson: Isaiah 5.
Devotional Reading: Psalm 24:1-4.

Explanations and Comments

The Evil of Intemperance, verses 10-12—"Woe unto them that rise up early in the morning that they may follow strong drink!" exclaims the prophet Isaiah. "Woe to them that continue drinking late into the night till wine inflame them," excites them to madness. Compare the apt Indian phrase, firewater.

"In every vice there is a stage beyond which, humanly speaking, recovery is impossible. A time comes when the jaws of the trap snap together, and the victim is caught. Intemperance this point is reached imperceptibly, and the victim is ignorant long after others see his danger. His captivity is made known to all, and to himself, when he needs to rise up early to follow strong drink!"—Expository Times.

The instruments which had been dedicated to the worship of Jehovah were hanged and the tabret, the harp and the pipe, as well as wine were in their feasts. "The harp consisted of a sound-box at the base, with wooden side-arms, and a crossbar connected by the strings with the box below. The late was a guitar. The tabret was a small hand-drum; unlike the modern drum, the parchment was probably rigidly fixed, and thus incapable of being tightened or loosened so as to regulate the pitch. The pipe seems to have been the wind instrument in most common use. It may have been a simple flute, a mere tube with holes, played by blowing either into one end or into a hole in the side. It is possible that it was a reed instrument with a double and vibrating tongue, or with a single tongue."—Hastings Dictionary.

"Pleasure-loving people forget God. His counsels, His law. Their love of drink and dissipation blinds their eyes, dulls their ears, so that they have no quiet moment to recollect their Maker. These verses are exactly true nowadays of many. They never have time to reflect, they enslave themselves to drink and a passion for amusement, till duty, charity, compassion, divine truth, have all faded out of their minds."—Edward King.

The Ways Of Lightning

Scientists Have Discovered Many Facts Regarding Its Vagaries

Just as if we have nothing to worry about, scientists now tell us that lightning can strike upward just as well as downward. They have 185 photographs to prove that lightning bounces. You may be quick enough to sidestep a bolt detected on its way down, but what's the use? You'll be caught on the rebound, though it probably doesn't make any difference to the person struck whether lightning hit an upper or delivered a rabbit punch.

In fact, the whole thing oughtn't to make any difference to anybody struck or not struck. The great majority of us have survived hundreds of thunderstorms just by taking care that lightning did not fall on us from above. It wouldn't have saved many persons had the newly discovered facts been household lore a century ago. In the same breath the scientists announce that negative lightning is the deadly variety; positive lightning, won't do any worse than melting the filing in one's teeth. How to tell whether an approaching bolt is negative or positive is not included in the information.—Newark Evening News.

Egg Powder Plant

An egg powder plant which will consume 180,000 eggs a day has been opened at Saskatoon, Saskatchewan. During recent years, China has had practically a monopoly of the egg powder business, a share of which will now be sought by the Saskatchewan industry.

South Africa has a movement to stop hoarding among farmers.

Comedian (to chorus girl): "Are you laughing at me? I am not in the habit of being laughed at."—Allitt for Alls, Stockholm.

RAIL PROBLEM REPORT TO BE SUBMITTED SOON

Ottawa, Ont.—The report of the royal commission on transportation will be ready well in advance of the opening of parliament. Whether or not it will be given out before the opening or held until the members can have the first look at it, is for the government to decide. The commission prepares the report and presents it to the government. Then its duties are complete.

The actual writing of the report has not yet commenced, it is understood. The commissioners, under the chairmanship of Mr. Justice L. P. Duff, are gathering day after day, weighing the facts collected in sittings throughout Canada and considering possible reasons for the situation as presented to them.

They have before them the balance sheets of both great Canadian railways, supplemented by the personal testimony of Sir Henry Thornton, former president of the Canadian National, and E. W. Beatty, president of the Canadian Pacific. High officials of both systems have furnished information.

Provincial governments and business organizations have been given a chance to present their views. It is for the commission to pick out the great mass of evidence before it, some suggestions or recommendations which will tend to the solution of Canada's greatest single problem.

The question of establishing a permanent commission to supervise the operations for both railways has not, it is understood, been considered. Whether or not this will find a place in the commission report remains to be seen. Certainly it appears likely the report will contain recommendations designed to cut out duplication of lines and services. It will also, in all probability, indicate means for the control of motor bus and truck competition.

If the report contains any drastic recommendations for cutting out branch line services, its reception in parliament is apt to be somewhat mixed. Members of parliament are inclined to be critical of any proposal which tends to deprive their constituents of railway services.

Free Trade For Denmark

Canadian Business Men Bidding For Large Portion Of Market

Montreal, Que.—Adoption by Denmark on September 1, of a sweeping free trade policy was announced by the Montreal Board of Trade on the basis of "authoritative" information. The consul-general for Denmark in Montreal was unable to confirm the announcement although it had been unofficially reported to him officials of the foreign exchange department of the Danish National bank in Copenhagen had issued a statement to this effect.

All cattle, fodder, coffee, rice, raw tobacco, seeds and fruits for oil-pressing purposes, pigiron and raw metals would be admitted free to Denmark under the new policy, thus creating one of the most important free markets in Europe. Canadian business men, it was stated by officials of the Montreal board, are mustering forces to obtain as large a portion as possible of this market.

Smuts Not Optimistic

Capetown, South Africa.—"Concessions granted South Africa cannot be expected to bring about any material improvement in the country's economic position at the present time or for many years to come." This was the comment of Gen. Jan Christian Smuts on the work of the Imperial Conference.

Enter Military College

Ottawa, Ont.—Thirty-eight recruits, including 24 from the east and 12 from the west, have been selected to enter the Royal Military College of Canada, Kingston, Ont., for the term commencing August 29, the Department of National Defence announced.

W. N. U. 1937

C.N.R. Retrenchment

Economies Expected To Effect Saving Of \$750,000 Annually

Montreal, Que.—Economies of about \$750,000 annually are expected to result from further reductions in personnel and salary ratings announced by S. J. Hungerford, acting president of the Canadian National Railways. In August, 1931, salaries of officers and supervisory forces were cut 10 per cent. The continuing decline in revenues, Mr. Hungerford said in a statement, has necessitated further retrenchments.

The programme of curtailment of staffs is believed to abolish about 55 positions, while the cuts in salaries are, in connection with higher paid men at least, expected to run as high as 40 per cent.

Action was taken, the statement said, after a careful examination of the duties performed by the many officers. Wherever it appeared positions could be abolished or consolidated without lowering efficiency, such a course was adopted. The salary cuts affect all those receiving \$5,000 a year or more.

Besides the matter of economy alone, the statement indicates, certain special circumstances had to be taken into account. For several years executives had not been occupied with transportation and maintenance alone. Problems of reorganization and consolidation of lines, construction and institution of improved practices had required more men of executive type. These were not now necessary in so large numbers and in many cases their positions might be abolished.

A Retaliatory Measure

Dean Corbett Refers To Effect Of Economic Conference On U.S.

Williamsstown, Mass.—The Imperial Economic Conference at Ottawa was described largely as a retaliatory measure initiated for the most part by Canada to express resentment against the Hawley-Smoot tariff of the United States, by Dean P. E. Corbett of McGill University.

Acting as chairman of a special symposium on the conference, in connection with the Institute of Politics here, Dean Corbett agreed however, with Prof. John Henry Williams, United States economist, that the Ottawa agreements would not seriously disturb United States trade.

Prof. T. E. Gregory, of London, England, distinguished British economist, asserted the Ottawa agreements represented the victory of "raw material countries over an old industrial country."

Cholera Raging In China

Deaths In Shensi Province Total 500 A Day

Hankow, China.—Reports from various districts of Shensi Province said cholera is raging throughout the province with increasing intensity, deaths totalling 500 a day. Scores of villages have been wiped out, it was said.

Cholera is more virulent throughout China this summer than at any time in recent years, and even foreigners living where sanitary conditions are good, and clean food is obtainable, have been stricken.

The disease continues unabated throughout the Yangtze Valley provinces despite cooling weather, which usually puts an end to it. Hundreds are dying daily in Honan, Anhwei, Hupeh and Shensi, the provinces which are hardest hit. The disease is sweeping towns, villages, and the countryside alike.

Retires From Service

Winnipeg, Man.—After serving the C.N.R. with distinction and continually in western Canada, since its inception there 36 years ago, D. R. Campbell, general superintendent of construction, has retired from service, H. A. Dixon, chief engineer announced.

Remored Date For Session

Ottawa, Ont.—Thursday, October 27, is mooted as the probable date for the opening of the fall session of parliament. No definite decision, though, it is stated on high authority, has been reached.

FORMS WHITE ARMY

Dr. O'Higgins, of the Irish Free State, President of the volunteer division of the Saoratal Army Comrades, who announces the formation of a new "white" army which will stand between the people and the menace of secret organizations, to support lawfully constituted government and maintain law and order."

Anglo-Canadian Treaty

Premier Brownlee, Of Alberta, Sees Benefit To Western Canada

Ottawa, Ont.—Western Canada should benefit from the wheat and livestock provisions of the Anglo-Canadian trade treaty, this opinion was expressed by Premier J. E. Brownlee, of Alberta, who is conferring with the Dominion Government on the financing of the 1932 wheat crop.

The six-cent preference in the British market, said Mr. Brownlee, should benefit the western farmer and the removal of the restrictions against Canadian cattle should prove an added boon.

S.S. Pennyworth Sails

Capt. Mount Expects To Make Second Round Trip This Season

Churchill, Man.—Following a race against time when extra shifts worked throughout the night the S.S. Pennyworth sailed away at 11:25 a.m. Wednesday, August 24, for London, England, carrying 255,700 bushels of No. 1 Northern wheat and 880 tons, or 31 cars of flour and feed. The last minute rush gave Capt. W. Macdonald a chance to clear out on the high tide with a ship low in the water, and filled to capacity. He will make fast time to England in the hope of making a second trip this season.

Thanksgiving Day October 10

Ottawa, Ont.—Thanksgiving Day will be celebrated this year on Monday, October 10. An order-in-council fixing the day has been passed. Following legislation passed by parliament, Armistice Day, November 11, and Thanksgiving Day are no longer celebrated simultaneously.

ROYAL SUSSEX REGIMENT TAKE OVER GUARD DUTIES

When the Brigade of Guards who normally furnish the guard for the Royal Palace left London on Field Training the 1st Battalion Royal Sussex Regiment took over the guard duties. The Royal Sussex men are shown with their regimental flag passing Buckingham Palace. It is considered a great honor to be given the duties of guarding the British Royal Palace.

Drowned In Arctic

H. G. Watkins Was One Of Britain's Distinguished Explorers

Angmagssalik, Greenland.—H. G. Watkins, one of the most distinguished of younger British explorers, was drowned when his kayak—a one-man Eskimo canoe—upset in the sea. He was only 25 years of age.

Watkins rescued Augustine Courd from the Greenland icecap last May after Courd had, a member of Watkins' expedition, had been unroofed for several weeks.

Details of the accident were not available. Watkins was leading an expedition investigating possible sites for air bases on an Arctic air route between Great Britain and Canada.

Despite his youth he had established himself as a distinguished explorer. He held the Royal Geographic Society's medal. Shortly before he set out on this expedition he had been engaged to marry Miss Margaret Rose Courd.

The kayak is a difficult craft to operate. The Watkins' expedition had been especially made, and the members went into training to learn how to use them.

Curfew Law Enforced

Nine O'clock Means Something To Children In Aymer, Quebec

Aymer, Que.—The long, mournful blast of a siren sounded in Aymer on a recent night—it was the 9 o'clock curfew—but it meant nothing to the children on the streets, who continued to play.

Suddenly, Chief Delbert Dumoulin and his force swept around in battle array. Thirty-seven boys and girls were taken into custody by the officers of the law, lodged in the town cells, and, despite the protests of indignant parents, remained there until their release one hour later, at 10 o'clock. The "prisoners" included 28 boys and nine girls, ranging in age from nine to 16 years.

For the first time in eight years, since it was placed on the statute books, the curfew law had been enforced. "And from now on," Chief Dumoulin explained to the irate parents, "it will be enforced."

Script For Tax Payment

Calgary, Alberta.—Issuing of script valued at \$1,150,000, which represents one-third of the annual tax revenue, to be returnable to the city for payment of taxes only, has been recommended to the city by the Unemployed Married Men's Association, as a means of saving bank interest and exchange losses totalling about \$74,000.

Prince May Visit Sweden

London, England.—It was learned on high authority that the Prince of Wales intends to visit Sweden some time in October but that no definite date for the trip has been fixed. The information recalled frequent rumors in the past that Princess Ingrid of Sweden might become the prince's bride.

BACK TO THE LAND PLAN TO BE ENCOURAGED

Ottawa, Ont.—Although the time has been too short to indicate the general reaction, the opinion has been expressed in many official sources that the provisions in the agreements reached at the Imperial Economic Conference would result in a stimulation of the movement "back to the land."

"All that is wanted is a tangible hope that the farmers may get a return for the labor—even to an extent only approaching what they could expect from industry in the urban centres—to restore the equilibrium to a healthy state," declared one official here.

Since 1891 there has been a steady decrease in the rural population and a corresponding increase in the growth of urban population. In 1891 the percentage of heads of families earning their living direct from the land was 68. In 1931 this percentage had fallen to 46.

A constant stream of provincial and municipal officials' has been passing through the colonization offices of the Minister of Immigration since the inauguration of the "back to the land" movement early this summer, and every province in the Dominion is now actively interested.

Manitoba Reducing

Civil Service Salaries

Government Maps Out Economy Programme To Balance Budget

Winnipeg, Man.—Determined to cut some \$750,000 from its expenditures for the present fiscal year, the Manitoba Government will reduce the salaries of all its employees by another seven per cent. beginning September 1.

The cut, together with one effected previously, brings the total reduction to 15 per cent. on lower salaries and 25 per cent. on higher. It affects everyone from cabinet ministers down.

Faced with declining revenues and increasing expenditures on relief, Premier John Bracken and his ministers recently mapped out the economy programme, which is designed to keep the budget balanced.

Besides the salary reduction, amalgamation of various government services, elimination of a number of grants and reduction of the grants to the University of Manitoba are forecast. Mr. Bracken said there would be curtailment of grants to public schools.

Will Aid Canadian Ports

Grain Formerly Shipped Via U.S. Now To Go By Dominion Routes

Montreal, Que.—As a result of the six cents a bushel preference granted Canada by the United Kingdom in the agreement signed at the Imperial Economic Conference, millions of bushels of Canadian wheat that has formerly been shipped via the United States will now be exported from Canadian ports, J. H. Rainville, president of the Montreal harbor commission, stated here.

He declared that the agreement would result in a great increase in the handling of grain in Montreal, Saint John, N.B., and Halifax.

An Unrealized Ambition

Montreal, Que.—General Sir Arthur W. Currie, commander-in-chief of the Canadian corps in France, and now principal of McGill University, confessed his unrealized ambition to have been a member of one of Canada's elite teams. The admission came during a luncheon to a contingent of British cadets, who arrived here following their shoot at Connaught ranges, Ottawa, against the pick of Canada's young rifle shots.

Boycotting Japan

Shanghai, China.—The "Blood and Iron" society, an organization formed to promote an anti-Japanese boycott, is becoming increasingly active with threats against merchants handling Japanese goods.

A Happy, Useful Occupation

Other people may grow old but a teacher has no more right to do so. Other people may grow dull and stupid, but not the teacher, says The Golden Age. Chalk dust causes considerable laryngitis and acute bronchitis, and there is some predisposition to tuberculosis and heart disease among teachers, but, taken as a whole, the teacher's lot is an enviable one.

It is a grand privilege to be in constant contact with the young, to guide, encourage and help the most ardent, enthusiastic and ambitious among us, to stimulate them, to repress them, to partake of their hopes and their spirit, to be a comrade and a confidant of boys and girls, the most interesting things in the whole wide world.

The Wise Principal.

An intelligent educator has observed very wisely that parents should have vacations from their children, and children should have vacations from their parents.

The wise principal of every school has the children assemble as usual and on some heavenly day in spring, unknown to anybody in advance, he tells them "There will be no school today." The happy surprise of such a day lasts throughout a lifetime.

Another wise principal is one who on a day unknown to them sends all the teachers off for the day and leaves the school under the guidance of a student body trained for the task, while he stays around so as to be on hand in case of emergency.

What Shall It Profit a Man—

Knowledge is power. For the lack of it people often throw away much of their effort. Hundreds of gardens in Alberta are almost a blank this year thru the ravages of insects, particularly cutworms, notwithstanding the warnings broadcast thru the columns of the press. Experts offer assurance that cutworm bait, if properly spread, will not poison poultry. They came complaints of the beet web worm, which devoured what garden stuff was grown.

Newspapers carried timely warnings of this insect, and instructions how to combat it. Either gardeners fail to read attentively or else they must be economizing by failing to subscribe to papers carrying the instructions.

People can be reached chiefly thru the press, and then only if they will subscribe to the papers carrying the messages, read these, absorb the information, and then file the clippings for future reference.

We all know that, at present, can't is about as scarce as hard teeth, but what shall it profit a man to save the price of a subscription and thereby lose his garden?

The 'A-P.' Personal Contact

The Alberta Pacific elevator in this district is part of a system of 375 country elevators, coal sheds and flour warehouses located in principal grain growing areas throughout Alberta, Saskatchewan & Manitoba, and operated by The Alberta Pacific Grain Company, Limited. Terminal elevator of the Company at Vancouver have a capacity of more than 6,000,000 bushels. In addition the A. P. has terminal elevator connections at the Head of the Great Lakes, and office floors in Calgary, Winnipeg and Vancouver.

The Alberta Pacific and predecessor companies commenced business in 1901 in territory now part of the province of Alberta. Wheat, growing in that area was then in its infancy. What was to develop into being by John I. McFarland, then a young man yet to earn his reputation in the grain trade. His record of fair-dealing with all farmers and customers who came in contact with him earned for him an enviable reputation which he carried thruout his progress and success in the Trade. The Company soon expanded to all the principal grain growing areas of Alberta, and into Saskatchewan and Manitoba.

With the commencement of movement of grain through the Port of Vancouver, upon the completion of the building of the Panama Canal, the "A.P." in 1924 became a pioneer in the development of the western movement of grain.

At its inception the "A.P." management realized the great asset of a grain company was personal contact to the greatest possible degree with its customers. The door of the General Manager, John McFarland, was always open to any farmer to pass the time of day or to assist in the settlement of any difficulty being experienced in connection with the handling or marketing of grain.

When financial control of the Alberta Pacific changed hands in 1926, John McFarland retired from active participation in the grain trade. Mr. McFarland devoted his time to his private interests until in 1930 he was called upon by the Government of Canada to take charge of the liquidation of wheat stocks held by the pools.

In 1930 James R. Murray, who had built himself an enviable reputation as an executive of United Grain Growers Limited, was called upon to take over the General Management of the "A.P." following retirement of the Stewart interest from control of the Company. Mr. Murray came to the Company well known to the agricultural population of the West, and with a record of achievement in the extension and development of the U.G.G. thruout Alberta and Saskatchewan.

The policy of fair dealing and direct contact with its thousands of customers, so well established by the founder of the "A.P." System, is that of the present management headed by Mr. Murray.

Short Wave Broadcasts

Montreal City Council recently awarded a contract to Northern Electric Co. for installation of a comprehensive Police Radio System. The equipment supplied will be in every respect similar to that supplied by Western Electric Co. to New York Police Dept., but will also include improvements recently brought out, and will be manufactured in Canada. Under

Sparkies Says.

What's the use? If you drive recklessly you'll dent the front of your car. If you drive carefully some one will dent the back of it. From what I observed at the Beach this summer, "sparkies" manufacturers should be able to operate their plants for the next three years on the cloth they left out of this year's models.

Open Seasons for Game.

Hansen's Corners.

The farmers here are busy harvesting. A great deal of wheat has been cut.

The community spirit of this district is spreading fast. A very enjoyable evening was spent at the Schoolhouse on Wed. last, the 24th, when practically all the residents of the district turned out.

Threshing here will shortly be in full swing.

Mr. W. R. Howson, leader of the Provincial Liberal party, is arranging to hold a public meeting at Hansen's Schoolhouse in the near future, when the public will have a chance to hear the truth as to how the Government is going on, and how the Wheat Pool is progressing. All are welcome to come and hear the facts.

The School Board has arranged that Miss Christina McDonald will teach at the Hansen school until Christmas holidays.

The scheme which Director Fern and Dufresne has laid down, all highways leading into and out of Montreal will be specially covered by the short wave broadcasts emanating from the 400 watt transmitting station in police headquarters.

The broadcasting equipment, which is entirely A.C. operated and crystal controlled, will operate on 175 metres. The two 1400 lb. 100 ft. steel antenna towers will be erected by Dominion Bridge Co. engineers on the roof of Police Headquarters, while the transmitting equipment will be located on 3d floor in a special studio designed to suit the peculiar nature of the purpose it will have to serve.

Thirty cars specially designed for Police patrol duty thruout the City will be equipped with receiving sets. Day and night the cars will cruise the streets manned by policemen armed with powerful guns, tear bombs and gas masks ready for any emergency. The cars will always be in direct contact with Headquarters.

Acquisition by radio by Montreal's Police Dept. in its battle against lawlessness will enable the police to throw a dragnet over the entire city immediately in the wake of crime and even to anticipate it, should they receive advice of the approach of desperate characters.

This should make Montreal, that is situated on an island, a very unhealthy location for the operations of acquisitive gentlemen with Gates or other forms of Knock-out.

UNITED GRAIN GROWERS LIMITED

A dividend at the rate of five per cent has been declared on the paid up capital stock of United Grain Growers Limited, for the financial year ending July 31st, 1932. Cheques will be mailed on September 1st, 1932, to shareholders of record at July 31st.

By order of the Board of Directors.

R. S. I.A.W.

President.

Winnipeg, Manitoba,
August 25th, 1932.

Church Services.

Services in St. Philip's Church next Sunday, 7.30 p.m.

There will be a Confirmation service on Sunday, Sept. 4th, at Rosenthal church, in the morning at 10.30.

REPAIR WORK!

All Kinds of Carpentering, Plastering, Brick Work, and Repair Work on Buildings.

Mr. Val. Pailer,
Stony Plain.

Here and There

Popularity of Canadian apples abroad has notableness increased and last year's apple exports to Europe from Western Canada reached a new high record of 1,740,000 boxes, as compared with 550,000 boxes in 1930. Fruit growers are anticipating an even larger crop this year.

R. Y. Danland, formerly Traveling Passenger Agent, Canadian Pacific Railway, Winnipeg, was appointed District Passenger Agent, Algoma District, North Bay, Ont., effective August 16th. Mr. Danland has had a long and successful career with the Company, and is now receiving congratulations on his most recent promotion.

Numbers of anglers returning through Ottawa and Montreal report having experienced exceedingly good bass fishing. This was the expression of a group from the reports of anglers who visited the bass fishing waters of the Gatineau River, north of Montreal, according to A. G. Seymour, General Tourist Agent, Canadian Pacific Railway.

This is evidently the peak year with partridge, one would judge from the reports of anglers and various parts of the Laurentian and Gatineau districts of Quebec, according to A. G. Seymour, General Tourist Agent, Canadian Pacific Railway. In almost every locality partridge, as the spotted grouse and Franklin grouse are best known, are very plentiful. Most flocks hatched this year are nearly full grown.

New freight rates on live stock with low minimum weights to meet the competition of motor trucks in the transportation of animals to market have been put into effect by the Canadian Pacific and Canadian National Railways covering movement from stations within a radius of 150 miles of Toronto, and these were effective from August 1st. The new rates are being tried out as an experiment, and it is expected that they will result in a very substantial increase in the rail movement of cattle, sheep, and hogs.

One of the most interesting passengers arriving in Montreal by the Canadian Pacific, Duchess of Richmond on August 15, was "Miss England III", the world's fastest motorboat. After the international races with Gar Wood's boat at Detroit, Kaye Don will take "Miss England III" to Toronto, where visitors at the Canadian National Exhibition will be able to see an attempt by the powerful vessel to lower her own record for a mile run on the lake. The big speed boat was accompanied by R. E. Garner, senior mechanic, and "mate" to Kaye Don during the races.

Two hundred organizations affiliated with the governing body of the Canadian Chamber of Commerce, whose seventh annual convention will be held at Halifax, September 13-15, will send members to a pre- and post-convention sea cruise and land tour with the Clarke Steamship Co., the Dominion Atlantic and the Canadian Pacific Railways, scheduled to leave Montreal September 2, and return there September 19. The sea cruise will be on the S.S. New Northland, calling at Charlottetown, Sydney, St. Pierre-Miquelon, St. John's, Newfoundland, and Halifax, prior to the convention, and will cover the Maritime Provinces after it.

Cost of travel to Eastern Quebec, the Lower St. Lawrence and to resorts in the Maritime Provinces has been deflated this summer in a fare revolution that has never been equalled in the history of the railroads of Canada. This reduction works out about one and one-tenth for the round trip to any one of a score of glorious summer centres on Canada's unsurpassed Atlantic seaboard with proportionately reduced fares to many other destinations in eastern Quebec and the Maritime Provinces which are also in effect from stations in the province of Quebec, Montreal and west, and also in Ontario, Sudbury, Capreol, Windsor, Barrie and east. This great concession by the railroads of Canada is on offer during the month of August with a return limit of 21 days, excluding the date of sale. (652)

CHAPTER XXXX—Continued.

Facing her, as she reached the top-most step was a glass door, giving entrance to Claire's own particular sanctum, which usually, in summer, stood wide open to admit the soft, warm air and the fragrant scents breathed out from a border of old-fashioned flowers, sweet, and prim and quaint, which encircled the base of the house.

But today the door was shut and forbidding-looking, and Jean experienced a sudden sense of misgiving. Supposing Claire chanced to be out just when she had a cunning look over with the hundred little feminine confidences that were to have formed part of the "heart-to-heart" talk! It would be too aggravating!

Her eager glance flew ahead, searching the room's interior, clearly visible through the wide glass panel of the door. Then, with a startled cry, she halted, her hand clapped against her lips to stifle the involuntary exclamation of dismay and terror that had leapt to them.

The afternoon sunshine slanted in upon a picture of grotesque horror—a nightmare conception that could only have sprung from the macabre imagination of a madman.

In the middle of the room Claire sat bound to a high-backed chair, secured by cords which cut cruelly across her slender body. Her face had assumed a curious ashen shade, and her eyes were fixed in a numbed look of fascinated terror upon the tall, angular figure of her husband, which pranced in front of her jerkily, like a marionette, while he threatened her with a revolver, his thin lips, smiling cruelly, drawn back from his teeth like those of a snarling animal.

He was addressing her in queer high-pitched tones that had something inhuman about them—the echoing, empty sound of a voice no longer controlled by a reasoning brain.

"And you needn't worry that Mr. Brennan will be overwhelmed with grief at your early demise. He won't—he-he—he" he gave a foolish, cackling laugh—"he won't have time to miss you much! I'll attend to that—I'll attend to that! There'll be a second bullet for your dear friend, Mr. Brennan."

Crack! The sharp report of a revolver shattered the summer stillness as Jean sprang forward and wrenched at the handle of the door. But it refused to yield. It had been locked upon the inside!

Then, as the smoke cleared away, she saw that Claire was unharmed. Sir Adrian had deliberately fired above her head and was now rocking his long, lean body to and fro in a parody of horrible, noiseless mirth. Evidently he purposed to amuse himself by inflicting the torture of suspense upon his victim before he actually murdered her, for Latimer had been at one time an expert revolver shot, and, even drug-ridden as he had since become, he could not well have missed the helpless target by accident.

Claire's head had fallen back, but

no merciful oblivion of unconsciousness had come to her relief. Her mouth was a little open, and the breath came in short, quick gasps between her lips. Her face looked like a mask, set in a blank stupor of horror.

"The sound of the shot brought Blaise and Nick racing to Jean's side. One glance through the glass door sufficed them.

"God in heaven! He's gone mad!" Nick's voice was quick with fear for the woman he loved.

"Get Tucker here at once!" Blaise's swift command, flung at her as he and Nick leapt forward, sent Jean flying along the terrace as fast as feet winged with unutterable terror could carry her. As she ran, she heard the crash of splintering glass, as the two men she had left behind smashed in the panel of the locked door, and, almost simultaneously, Sir Adrian's pistol barked again—another shot, and then a third in quick succession.

The sound seemed to wring every nerve in her body. Blaise . . . had that madman shot him?

With sobbing breath she rushed blindly on into the house and met the butler, running too, white faced and horror-stricken.

"My God, miss!—Sir Adrian's murdering her ladyship—and the room door's locked!"

Not waiting to hear the end of the sentence Tucker bolted out of the hall and along the terrace, while Jean leaped up against the doorway drawing long, shuddering breaths that seemed actually to tear their way through her throat and yet brought no relief to the agonized thudding of her heart. For the moment she was physically unable to run another yard.

But her mind was working with abnormal clarity and swiftness, while she was doing her best. If she had not discussed the day when he had proposed taking Claire away with him, all this would never have happened. . . . Claire would have been safe—safe! But she had interfered, plunging to her belief, that no good ever came by doing wrong. . . . Now her cruel husband held her utterly. Sir Adrian's resistance of temptation was culminating in a ghastly tragedy that might have been avoided. To Jean it seemed in that moment as if the world were falling in ruins about her.

Sick with apprehension she almost reeled unsteadily at the door, the shrill, excited voices of the frightened servants who had collected in the hall outside the room.

For a few breathless seconds Jean was in doubt—wondered wildly whether Sir Adrian would succeed in breaking away from his captors. Then she saw Nick's foot shoot out, and suddenly like the piston-rod of an engine, and Sir Adrian staggered and came crashing down on to his knees.

The other two closed in upon him swiftly, and a minute later he was lying prone on his back with the three men holding him down by main force.

With difficulty avoiding the protruding pieces of glass, Jean stepped into the room. Her first thought was for Claire, who now hung helpless and unconscious against the bonds that held her. But Blaise very speedily directed her attention to something of more urgent importance for the moment.

"Unlock that door," he called to her. "Quick!" He was still panting from the exertion of the recent struggle. "Get a rope of some sort!" Jean turned the key and tore open the door leading into the hall. The lithe stock of servants gathered outside

it overflowed into the room, frightened and excitedly inquisitive.

"Get some rope, one of you," commanded Jean authoritatively. "Anything will do if it's strong!" Two or three of the servants broke away from the main body and ran frantically in search of the required cord, glad to be of use, and very soon Sir Adrian, bound as humanely as his struggles rendered possible, was hoisted to the room and laid upon his bed.

"Ring up the doctor," ordered Blaise, as he assisted in the rather difficult process of conveying Sir Adrian upstairs. "Tell him to come to Clairwood, as quickly as he can get here!" And another order, with detachment of domestics flew off to carry out his bidding. The underfootman won the race for the telephone by a good half-yard, and in a voice which fairly twittered with the lightning and amazing news he had to impart, transmitted the message to the doctor's parlour-maid at the other end of the wire, adding a few picturesque and stimulating details concerning the struggle which had just taken place—and which, apparently, he had perceived with the eye of faith through the window panes of the locked door.

Meanwhile, Nick and Jean had turned their attention towards releasing Claire, who, as the last of her bonds was cut, toppled forward in a dead faint into the former's arms.

A second procession wound its way upstairs, Nick being the slight, unconscious figure in his arms while Jean and a kindly-faced housemaid followed.

"Her ladyship's maid is out, miss," volunteered the girl. "But perhaps it can help!"

Jack, smiling at her, the frank, friendly man that always won for her the eager, willing service of maid and maid alike.

"I'm sure you can," she said gently. "As soon as we can bring her ladyship round, you shall help me undress her and put her to bed!"

In a few minutes Claire recovered consciousness, but she was horribly shaken and distraught, crying and clinging to Jean or to the housemaid—who was almost crying, too, out of sympathy—like a child frightened by the dark.

Jack, understanding just what was needed, whispered Nick to the door of the room, where he lingered unhappily, his anxious gaze still fixed on the slender shuddering figure upon the couch.

"Don't worry, Nick," she said reassuringly. "She'll be all right; it's only reaction. But I know what she wants—she wants a real mother's care. Go down and ring up Lady Anne, will you, and ask her to come over in the car as quickly as she can."

Nick nodded; the idea commended itself to him. His "pale, golden narcissus," so nearly broken, would be safe indeed with the kind, comforting arms of his mother about her.

The Tobacco that treats You right!

Gives you a cooler, sweeter, more fragrant smoke in your pipe, and thousands of men now realize the big difference that QUALITY can make to smoking pleasure.

OGDEN'S CUT PLUG

If you roll your own, use Ogden's fine cut cigarette tobacco.

It was an intense relief to Jean when Lady Anne arrived and quietly and efficiently took command of affairs. And there was some need for her unruffled presence and capability throughout the night that followed. Claire, nervous and utterly unstrung, slept but little, waking constantly with a cry of terror as in imagination she relived the ordeal of the afternoon, while in the big bedroom across the landing, where her husband lay, the grim shadow of death itself was drawing momentarily closer.

By the time the doctor had arrived in answer to the summons sent, there seemed small need for the strong cords with which Sir Adrian's limbs were bound. The wild fury of the afternoon's struggle had thoroughly exhausted him, and he lay, propped up with pillows, apparently in a state of stupor, breathing very freely.

"Hear!" the doctor told Turnbull after he had made a swift examination. "You know for months that Sir Adrian might go out at any moment. His heart was already impaired, and, of course, he's drugged for years. He may recover a little, but if, as I think is highly probable, there's any recurrence of the brain disturbance—why, he'll not live out a second paroxysm. The heart won't stand it!"

Turnbull endeavored to look appropriately shocked. But the doctor was a man and an honest one, and not even professional etiquette prevented his adding, with a jerk of his head in the direction of Claire's bedroom:

"It would be a merciful deliverance for that poor woman. There's a strain of madness in the Latimers, you know! And—well, a shrew—naturally Sir Adrian's habits have accentuated it in his own case."

But the doctor was mistaken in calculations. Sir Adrian's constitution was stronger than he estimated. As Nick once bitterly commented to Jean, the man was like a piece of steel wire, and two dreadful outbreaks of maniacal fury had to be endured before the wire began to weaken.

During the course of the first paroxysm it was all the four men could do to restrain him from leaping from the bed and rushing out of the room, since, during the period of quiescence which had preceded the doctor's arrival, a mistaken feeling of humanity had dictated the loosening of the cords which bound him.

He fought and screamed, uttering the most horrible imprecations, and his evil intent towards the woman who was his wife was unmistakable. With her husband free to work his will, Claire's life would not have been worth a moment's purchase.

In the period of calm that succeeded this outbreak Sir Adrian was again secured, as mercifully as possible, from any possibility of doing his wife a mischief, and the second paroxysm which convulsed the bound and shackled madman was very terrible to witness.

Like its predecessor, this attack was followed by a stupor, during which Sir Adrian appeared more dead than alive.

He was palpably weaker, restoration falling to produce any appreciable effect, and towards morning in those chill, small hours when the powers of the body languish and fail, the crazed and self-tormented spirit of Adrian Latimer quitted a world in which he had been able to perceive none of those things that are just and pure, and lovely, and of good report, but only distrust and malice and, finally, black hatred.

As twilight had come and gone, Sir Adrian's body had been laid to rest in Coombe Revie churchyard, and Claire, in the simplest of widow's weeds, went about once more, looking rather frail and worn but with fugitive light of happiness on her face that was a source of rejoicing to those that loved her.

(To Be Continued.)

Miller's Worm Powders prove their value. They do not cause any violent disturbances in the stomach, any pain or griping, but do their work quickly and painlessly, so that the destruction of the worms is imperceptible. Yet they are thorough, and from the first dose there is improvement in the condition of the sufferer and a cessation of manifestations of internal trouble.

The oldest apple orchard in America was planted 300 years ago by Spanish settlers at Massaso, New Mexico.

There is
NO ODOR
from FISH

or from
Vegetables cooked
in GANAPAR

Billed, or steamed, fish comes out firm and solid, swimming in its own juices when you seal it in Ganapar Cookery Parchment. No fishy odor. No gummy steamer or casserole when you seal it afterwards.

And vegetables are simply delicious. Using Ganapar you can cook three at once in the same pot over one burner turned low. Ganapar acts on them as it does on fish. Retains all the natural taste and flavor. Fat and juices from meat won't burn if you line your roasting pan with Ganapar. No pan-scraping afterwards.

Ganapar only costs 25 cents for a large envelope. You can use each sheet repeatedly because it won't absorb odors. Makes a perfect cloth because it is silky, strong, and doesn't spread lint.

Special Offer
GANAPAR is made by the makers of the famous PARASANT Heavy Waxed Paper in the Green Box. Most grocers, druggists and department stores have Ganapar on sale, but if yours hasn't send coupon direct to the makers and we will give you a new and unique book entitled "Leftovers," containing one hundred recipes as a bonus for your trouble.

Appleton Paper Products, Ltd., Hamilton, Canada.
Enclosed find 25c for which please send me one full size package of GANAPAR COOKERY PARCHMENT and your 100 recipes for "Leftovers."

U.G.G. Are Mailing Checks.

United Grain Growers Ltd. have announced the payment of a dividend at the rate of five per cent on the paid up capital stock of the company out of earnings for the fiscal year ending July 31st, 1932. In making the announcement during the course of a directors' meeting held at Calgary, R.S. Law, president of the company stated that the earnings of the company had been sufficient to pay bond interest to provide full depreciation, and after payment of the dividend to permit of a satisfactory addition to the surplus accounts of the company.

Dividend checks will be mailed from the office of the company on Sept. 1st, to shareholders of record at July 31st, 1932.

Confirmation Service on Sunday Next.

On Sunday next, Sept. 4th, a Confirmation service will be held at Rosenthal Lutheran Church at 10.30 a.m.

The following are the names of the young people to be confirmed—

Lloyd Walter Wille,
Ella Earnestine Schneider,
Elizabeth Mary Kulak,
Ida Clara Lutz,
Class-Kotscherowski.

Spruce Grove News

Mr and Mrs Sutherland and family have moved, this week, back to their old home town, Westlock.

Miss Annie Hanke, the popular waitress at the Curtis Restaurant, returned last week to her home, at Mundare.

Miss Ruth Poetzsch has secured the appointment as teacher at Hay Lake School. The Grove school re-opens today, Thursday, with the same staff of teachers as last session.

Owing to Monday next being a public holiday, Spruce Grove Councillors will not meet until the following day, Tuesday, the 6th.

Edmonton Beach.

On Saturday the last of the juvenile guests of the Kinsmen club left for their homes in the City. There were in the party 13 girls and 12 boys, and they had been housed, during their stay, in Rotary club building.

On Saturday evening last Mr and Mrs J Walsh were hosts to a large party of cottagers at a corn roast.

A number of the cottagers closed their places this week for the season, owing to the fact that children are due to be present at the opening of schools in Edmonton today, the 1st.

Duffield Doings.

Fred Swalbe, an old-time resident of Highvale district, passed away in an Edmonton hospital on Saturday last, Aug. 27th.

The funeral took place on Monday last, from St. Dominic's church, Duffield. Rev C Keenan, the pastor, conducted the service. A large crowd of friends and neighbors of the deceased were present at the funeral. Deceased had lived in the district for 24 years. He is survived by his wife, 2 sons and 3 daughters.

Harvesting at Peak

A bulletin from the Dept. of Agriculture says: Harvesting operations in Alberta as a whole will be at their peak this week, weather permitting. Cutting is now well under way in all parts of the province, under generally favorable conditions, and most of the 97,400 farms in Alberta are in action.

Some threshing has already been done in the south country, and it is stated that in general the crop is turning out well, with a fairly good average anticipated.

Blinding Headlights a Peril.

What has become of the courteous motorist who dimmed his headlights when passing another car, asks an exchange. According to inquiries made, prompted by the protests of drivers who claim that highways are being made more dangerous for night driving, the species making use of dimmers is almost extinct.

Motorists who partially dim their lights when approaching another vehicle going in an opposite direction are few and far between. A motorist is not required by a Highway Traffic Act to operate dimmers, it is said, when passing another vehicle. The low powered bulbs are made part of practically all motor vehicle headlight equipment solely for the purpose of insuring greater safety in night driving.

Schedule of Mails.

To the East—Every day except Sunday; train No. 2 at 6.18.
From the East—Every day except Mon.; train No. 1 at 24.16.
